

*Full list of eligible countries on schlumbergerfoundation.com

If you answered 'yes' to both questions you can now apply for funding from the Faculty for the Future program.

Applications for 2026 PhD and Post-Doc funding for women engineers and scientists from low- and middle-income countries are open between 1st Sept -7th Nov 2025

This year, we are particularly keen to see applications from the following academic disciplines: Physical Sciences, Engineering, Computer Science and Mathematics. **To apply, you must:**

- Be a woman from an eligible country.
- Be pursuing a **PhD or post-doctoral research** in a STEM field.
- Be enrolled, admitted, or have applied to a university or research institute abroad.
- Have an excellent academic record.
- Be committed to returning to your home country to contribute to its socioeconomic development.
- Demonstrate **leadership, community engagement**, and a track record of encouraging women and girls in STEM.

Take your place

If successful, you gain more than just funding, you become part of a supportive academic and professional global cohort of the Faculty for the Future.

Powering balance

Schlumberger Foundation is an independent non-profit organization with a long-standing commitment to support education in Science, Technology, Engineering and Mathematics (STEM).

We encourage gender parity by connecting a network of talented women engineers and scientists from the world's low- and middle-income countries. Successful grant recipients join our Faculty for the Future Fellows – a balancing force in meeting global sustainability goals.
